

## **KDADS HCBS Final Rule Stakeholder Call**

**3/16/2022**

### **Noon call (38 Participants)**

- 1) Question/Comment:** I am a limited license provider and I am marked compliant for everything. Do I still have to have compliance with a visitation before I am fully compliant?

**KDADS:** If you are marked fully compliant you are good at this time. You will be going into Ongoing Monitoring but you have some time to take a deep breath and relax. We will be in contact before we come out.

- 2) Question/Comment:** As far as privacy for locking doors, I have two doors. One is locking and the other doesn't. Do I need to have changes?

**KDADS:** As long as the individuals have choice in locking that would be satisfying.

- 3) Question/Comment:** I have two new locations. Do I do remediation now or plan ahead? Will I receive notification for current settings I have regarding their compliance status?

**KDADS:** Go to the Community Connections website and use the settings notification form. Put those two new settings in there to notify KDADS about the settings. You will have to go through remediation in the new portal. You will not be able to do that now. When the option is available we will inform you. If you're an existing provider and your information is in the system, it will show you if you're compliant or non-compliant. You will receive an email for each setting that is found compliant.

### **Evening call (4 participants)**

No questions or comments

**Adjourn**
